

## SPECIFICATION

### Absolute ethanol HQ

| CHARACTERISTIC                                                                                       | PARAMETERS |
|------------------------------------------------------------------------------------------------------|------------|
| Clear                                                                                                | total      |
| Mechanical impurities                                                                                | none       |
| Colour                                                                                               | colorless  |
| Content of ethanol in temperature 20° C, %<br>vol., not less than                                    | 99,8       |
| Content of carbonyl compounds count on<br>acetaldehyde in 1liter of 100% ethanol g, not<br>more than | 0,2        |
| Content of acids count on acetic acid in 1l 100%<br>ethanol %, not more than                         | 0,007      |
| Content of methanol in gram per 100ml 100%<br>ethanol not more than                                  | 0,01       |
| Content of higher alcohols<br>in 1l 100% ethanol, g/l not more than                                  | 0,02       |
