

## SPECIFICATION

### Absolute ethanol with RMKiS

| CHARACTERISTIC                                              | PARAMETERS       |
|-------------------------------------------------------------|------------------|
| <b>Appearance</b>                                           | Clear and bright |
| <b>Content of ethanol and higher alcohols</b><br>% w/w, min | 98,7             |
| <b>Content of higher alcohols</b><br>% (m/m)                | 2,0              |
| <b>Content of methanol</b><br>% (m/m)                       | 1,0              |
| <b>Content of water</b><br>% (m/m)                          | 0,300            |
| <b>Total acidity</b><br>% (m/m)                             | 0,007            |
| <b>Electrical conductivity</b><br>μS/cm                     | 2,5              |
| <b>Content inorganic chloride</b><br>mg/kg                  | 1,5              |
| <b>Content of involatile material</b><br>mg/100ml           | 10               |
| <b>Copper content</b><br>mg/kg                              | 0,100            |
| <b>Phosphorus content</b><br>mg/l                           | 0,15             |
| <b>Sulfur content</b><br>mg/kg                              | 10,0             |
| <b>Sulfate content</b><br>mg/kg                             | 3,0              |
